To Whom it may Concern,

I am emailing to express my concern about the hormones used in milk.  
If they are so safe, then why do you object to putting labels on the  
product!!!!!!

As a person who is interested in what I put in my body, it is my  
decision about what I choose to eat and I should be supplied with the  
proper knowledge about what exactly I am eating.

Come on guys, a little common sense and decency please!!!!

Thank you,  
Susan Freeman
